Heart Attack: 11/1989. CABG: 11/1989. PTCA: 6/1992. Risk Factors: Angina, Current Smoker, Family History of Heart Disease, High Cholesterol. Allergies: Penicillin.			

EKG Interpretation: Normal

09/12/2006

Dear Mr. Health:

Enclosed is your Pocket EKG Card that is provided as a result of your recent visit to **Lakeview Cardiology Associates**. Please review all of the information on the card front and call 1-800-589-4949 if you have any questions.

Your electrocardiogram (EKG) was reviewed by a cardiologist. Your EKG interpretation is displayed in bold print at the top of this letter. Please follow the appropriate directions for your EKG interpretation.

1. **NORMAL:** It was found to be within normal limits.
2. **MINOR ABNORMAL:** These alterations may or may not indicate the presence of heart disease. Many abnormalities are not significant. Please discuss your EKG with your family physician.
3. **ABNORMAL:** Such abnormalities vary in significance and must be interpreted in relation to an individual's symptoms and physical examination. Please discuss your EKG with your family physician. If you would like a cardiologist to review your EKG, due to insurance requirements, you may need to call your primary care physician for a referral to the cardiologist.

This EKG is meant to be compared with future EKG recordings. Its purpose is to provide an emergency physician with a baseline should you ever have a cardiac problem. It does not predict your chance for heart disease or heart attack. Please keep this card in your wallet and present it to your physician whenever needed. **Should you ever have a cardiac event such as a heart attack, this EKG will no longer be valid as a baseline and a new card needs to be made.** You may then call Sentara at 1-800-SENTARA (736-8272) to schedule a new Pocket EKG.

Sentara Heart Hospital is proud to be a leader in providing you with advanced heart care. Thank you for allowing Sentara to provide you with this health care service. Please visit www.sentara.com/heart for additional heart information or to learn more about the technologically advanced heart care offered throughout the region at Sentara.

Lynn Holder
Vice President
Sentara Cardiac, Vascular, Transplant Services

Sentara Heart Center at Sentara Virginia Beach General Hospital

Diagnostic Services

- Stress testing
- Electrocardiography (ECG)
- Echocardiograms
- Transesophageal echocardiography (TEE)
- Nuclear medical scans
- Doppler studies
- Holter monitor & EKG

Treatment: Invasive Services

- Cardiac catheterizations
- Drug-eluting stent
- Balloon angioplasty
- Atherectomy
- Pacemaker
- Medical management including state-of-the-science
- Drug regimens
- Rotoblator & laser
- Angiojet

Treatment: Electrophysiology

- Pacemaker insertions
- Defibrillator implantation
- Electrophysiology studies
- Ablation
- Tilt table testing
- Elective cardioversion

Cardiac Surgery

- Coronary artery bypass grafts
- Valve repair/replacement
- Minimally invasive heart surgery
- Off-pump open heart surgery

Prevention

- Lifestyle improvement
- Heart risk appraisals
- Screening clinics
- Community Education

Clinics

- Congestive Heart Failure
- Pacemaker

Follow-Up Services

- Cardiac rehabilitation at Tidewater Cardiovascular Institute

Quick Facts

- 9 nationally recognized cardiac surgeons
- 9 specially trained cardiac anesthesiologists
- over 16 board certified cardiologists
- 2 catheterization labs
- 1 operating rooms
- 1 electrophysiology lab

Hospitality Services

- Guest Services at Sentara Virginia Beach General Hospital for family traveling with patients to SVBGH for advanced heart care including heart surgery
